

Please do not lower the effectiveness of the Do Not Call legislation passed in Indiana. Since adding our number to the list, the amount of telemarketing calls we receive has dropped 98%. My children can now take a nap without a telemarketer waking them up. Our family can enjoy dinner together uninterrupted. I can answer the phone during the day and be assured it is someone that I actually know and want to speak to. The people of Indiana want this legislation to protect them from unwanted solicitors. I believe that over half of the homes in Indiana have already added their numbers to the list, and the list is still growing. Please protect my right to privacy.

Sincerely,
Jennifer Ray
